Installation Instructions. Read Me!

1. **DISCONNECT NEGATIVE (-) BATTERY CABLE.**
2. Remove throttle body air intake.
3. Remove (3) bolts from the throttle body.
4. Unclip throttle & cruise cables and remove from manifold and throttle lever.
5. Install furnished throttle & cruise cable bracket and tighten bolts. (Ref. "B")
6. Install both throttle & cruise cables thru reinforcement ring of throttle cable bracket. Slide and lock both plastic cable retainers into slot separately.
7. Install "O" ring into groove of spacer.
8. Install spacer using (3) 6mm x 50mm bolts and washers. (Ref. "A" & Step 4)
9. Reattach cruise & throttle cables to throttle body lever.
10. Inspect & Test throttle linkage for full Open & Closed travel before driving. Some cruise and kick down cables may require adjustment. Please refer to your vehicles service manual for proper adjustment.
11. Reinstall throttle body air intake assembly using **Step 2** as an example.
12. Reconnect negative battery cable. Enjoy!

The sound of power...The "whistle" means its working!
